CANNEALISM AT SEA.

**RLW YORL, Nov. 28.—[Special]—The Times has a consistory of the adventures of the arrow of a pi of boat which took a steamer to sea from Philadelphia. Being blown to sea and having no provisions, they were compelled to eat the flesh of one of the crow, who had died of oxidualish. The story goes that for sixty hours the men had nothing but salt water and the flesh and blood of their shipmate. The scene of the rescue wis "shipt-ship, so that in three days and two inglist they had durified around in that narriw space. PULITICAL POINTS

POLITICAL POINTS

THY "TRIBUNE" ON THE PACIFIC COAST

NEW YORK, NOW 28.—[Special.]—The Tribthe's editorial says Among noteworthy features
of the late election must be reckoned the attiiside of the Pacific states. Unlike Ohio, there
was no concentration of popular attention or
outside interterence, the redunption of the far
western states from Democratic rule being the
work wholly of their own grounsed voters. It is
true the democrats of Calaforma, with their
characteristic nistrict, made some hig blunders,
one of the worst being that of convening the
legislature in extra session, in order to establish
a rule for taxing railroad property, and a different rule for all other kinds of property, not to
mention the wastefulness and corruption of
the city and state governments under their rule.
The result is a clean sweep for the republicany
and the democratic state legislature is completeby reviewed, which insures a republican senator
to succeed Furley. Already the press is beginning to chawass the rhances of the several candidates. The foremost seems to be Sargent, who
so long represented that state in both houses of
congress, and during his absence from thesenate his, perhaps, has done as good work in his
contest with Bismarck, over the admission of
American pork into Germany. Califorum has
had no more faithful service than he rendered,
and his probable return to his old seat in the
senate will strengthen that body, as well as increase the influence of the Facilic coast.

A GOOD WORD FOR BRISTOW.

(HICAGO, NOV 15—[Special]—The Tracs' Washington special says A western democratic congressman stated to-day that he should not be at all surprised it tovernor Cleveland offered the treasury department to ex-Sevetary Rigistow, and continuous said. If should be not be at all surprised if foverior Cleveland offered the treasury department to ex-Se-retary Bristow, and, continuing, said "I should be extremely glad to have him do it. It would make a good impression on the country Cleveland was elected on the reform issue—Bristow represents that issue in a lugh degree. He proved himself courageous, incorruptible and persistent, when he was formerly secretary. He was fraced out of trant's calinet because he was bound to ferret out ruscals, no matter it it ey had behind the coat tails of Grant himself. He woust have nothing to learn about the treasury in (ther words, he would not be detended upon subordinates who are already in, is a new man must incritably be for awhile. He represents, better than anybody else, the republicans who supported Cleveland. If Bristow should be appointed the country would know (actly what kind of an administration it was to have Whether Bristow would feel his it indoning its law business, I don't know. He is not a beh man, and he would sacrifice a good ded by returning to politics."

A DECISION AGAINST A DEMOCRAT.
CHICAGO, NOV. 28.—The state capvassing board to-day decided, in the Leman-Brand contest, that from the testimony before it Brand, democrat, was not entitled to a certificate of election. They referred the matter to to-cornor Humilton for final decision. The governor stated that he would render a decision in the case next Monday.

A GERAT SCHEME.

NEW YORK, NOV. 28.—[Special.]—A profound social scheme is being concocled here to marry Cleveland to a southern laid, so that the south will have a representative in the white house that will give it great presuge to general society. It is understood that 'ullionative Corcoran has expressed his approval of the plan to give Cleveland a southern bride.

TRIAL OF AN ALLEGED BAROVET FOR BEGUNY

TRIAL OF AN ALJERFED BARONET FOR BUSINET TOY EDO, NOV 28—The trial of Charles Neivelle, the alleged buronet, for bigamy, which has been in progress during the present week, was resumed this morning after adjournment from Wednesday The attendance was integer than on the previous day. In May last Neivelle was married to a daughter of Mr. C. J. Whitner of heiroit, and was arrested at the instance of Whitner on a charge of lugamy. During the first two days of the trial the prosecution presented evidence of a former marriage by Neivelle, and three ladies whom he is suit to have married lave been present in court while the trial was going on. In tooday's proceedings a detective, who was in charge of the prisoner at the time of his arrest last spring, rehearised the story of Neivelle's life, as told by him at hot time. He claimed to have served in and been discharged from the English array. He left England in consequence of trouble with his mother, and came to his country and traveled in Newark, New Jersey, under the nange of George Perry, being drunk the night of the marriage. Spoke of another marriage in the state of hew York under the nange of Newbold said his real name was Sir Roger Tichborne Neivelle, and its land.

TRIAL OF AN ALLEGED BARONTT POB BEFARY
TOUNDO, Now 28—The trial of Charles
Muvelle, the alleged baronet, for biganny,
which has been in progress during the present
week, was resumed this morning after adjournment from Wednesday. The attendance was
larger than on the previous dvy. In May hast
Neivelle was married to a daughter of Mr. C. J.
Whitney of Detroit, and was arrested at the instance of Whitney on a charge of biganny. Dur
high first two days of the trust the prosecution
presented evidence of a former marriage by
Mencelle, and three ladles whom he as and to
have married have been present in court while
the trial was going on. In to-day's proceedings
a detective, who was in charge of the prisoner
at the time of his arrest last spring rehearsed
ite story of Neivelliè's life, as told by him at
that time. He claimed to have served in and
been discharged from the English army. He
left England in consequence of trouble with his
mother, and came to this country and traveled

Speculations Concerning Mr. Blaine

Speculations Concerning Mr. Blaine

HICAGO, Nov 25—The Inter Occors's Washington special of November 25 says Mr. Blaine's return to Washington at an early duy excites curroutly as to what his friends will do show their symp thy, and it is probable that the return of the Plumest hinght will not be made in absolute quest nor unnitigated darkness. His friends believe that his bold bomecoming indicates that he has decided to take a strong grap on the struction and lead his party As a minority cader Mr. Blaine would show to splended its intage, his transcendent abilities causing men of all factions to look to him for advice and vation. Braine's friends here do not nestate to point toward the White House with a tenark "If he can stand it Blaine am" If the welland intends to be a candidate in 1888 Mr. Blaine as all yuncends to have something to say about the matter. The facts in the recent fight will keep. It is also regarded as quite possible that neither Fresident Arthur nor Mr. Conkling will be a candidate for he senate without being in need of vites firm several Blaine men in the New York legislature. The idea of Blaine becoming for anne or's successor in the separte is aughed at zero as the wildest absurdity. Cum cron is also hately certain to be returned, and has, during the past week, succeeded in getting in slens of his in amount of cott circle to Congressia in Washburn cancie! HI. APPROVED OF 17. How an exactle

A man s animosity toward a political opponent is sometimes so bitter it at it does not cease effen when the opponent is dead. A year or two ago a geniterian who had figured most prominently not only in the history of Massa chusetts, but in the history of the country, suddenly came to the end of a long and userial life, in the day of the funeral one of the strongest political enemies of decessed, and a man whose name is known to every man, woman and child in the commonwealth, was uskel, "Are you going to attend Mr.—Is funeral o-day?"

No., "responded the distinguished g-internau, deliberately "but (dryly) I wish you to understand that I hearthly approve of it."

WASHINGTON, Nov. 20—11 is 1 curious fact that Mr. Arthur is the only republican president whose messages have not been printed in advance of their presentation to congress first year he called the pushe printer (Rounds) to the white house and such that he should hold him responsible if there were any premuture publication of the document. This year he made the same declaration. Mr. Rounds is setting up the document himself with the assistance of Cadet Taylor, his first assistant. He is correcting all the proofs, and the type s locked up in his big asfe when not in use. Mr. Rounds says the responsibility is making his hair grow white, but he is doing his best to protect the president's message from alworthy eyes.

HE MOUSE COT AWAY.

A reader of THE OREGONIAN makes this request "Please give a statement of Mr Blaine a pluralities in the United States. Such exhibiof course, would not include the states of the late southern confederary, whose politics and way of voting have been sufficiently known for more than a quarter of crenture. As they are always counted one way, even before an elecfigures. But it would be a salishe from to know how much Mr Blarte is the clinic Mr Cieve-

In answer to the above it may be stated that ing pluralities, fractions of hundreds being omitie I Mane 20 169 New Hungstare, 1290
Vermont, 22,600 Massachusetts, 27,500 Rhode
Island, 2000 Pennsylvana, 81,000 (tho,
31,800 Hi nois, 5-200 Mategan, 5-00
Wisconsin, 14,600 Lowa, 18,700, Minnesota, 47,800, Nebruska, 1°,900 kansas, t.3,200 Colorado, 5200, Culforma, 12,400, Oregon, 2301 Nevada, 1700 Total, 402,200. From which deduct (leveland's pluralities Indiana, 7400 New Jersey, 4100, New York, 1100 | Connecticut, 1300 -total, 15,900 making Blame's net plurality in the northern states, 388 300

In 1868 Grant's majority was only 305,458 vet Grant had the half of over \$0.000 plurality Tempessee, 17,000 m bouth Carolina, 12,000 in North Carolina and 9000 ig. West Virginia. It was immediately after the war, and those states had not yet reverted completely to fleer old con-federate masters. In 1804, when the election was decided upon the direct usus of saving the Union, Lincoln's impority was 147, 42, or onl 19,000 more than Elamen aw has yet I media get more than 19,000 from Maryland, and West Virginia states, which were held to the Un on by the northern armies, and their rote secured to Lincoln through suppression of their robel democracy. Bishe's plurality in the porthern states is much larger than that o' Hayes, though it is less than carrieds. Jor this last fact these are two main reasons. is the combination in certain states between the democrate and greenhack or Roller neonle, the hand and of the liquor men on the other. Ma hi gan, Iowa and New York illustrate these facts In Michigan Blaine's plurality is only 2010 while turffeld's was \$5,000. But in 1630 he greenback vote of Michigan was \$3,495 and it was cast for a separate electrical ticket. This time it "fused" with he democrats, and the two parties united or. single electoral ticket. Moreover, the prohibithen vote in Michigan in 1980 was but 942. This year it was 20,000, frawn in 1980, from the republicans. In lowar-sanfield had bo,000 plurain. But the ground ack vote of the state, then (2,701, this year was allied with the democrats in Iowa, enacted since 1880, has driven 10,000 fremmas and others out of the re-publican party, and to crown all, the prohibi tionists of the state but a separate ticket in the field, which took many votes from Mr Blaine In New York the case to the republicans through the conduct of the prohibitionists was more than sufficient to have given the state to Plaine by a greater plurully than Garfiel Deceived

It is apparent, therefore, that the actual plan ality for Blame in the northern states as much preater than that boxe stated, since Buffer's vote of 70,000 in Michigan and Lows a reckoned in this ode distant for the early Place is to Butler's credit, where it belongs, in I die plur airty for Blame will reach 460,000

We have not yet sufficient data upon which to found in approximate statement of Clevelan is of the states of the late confederacy elections are a farce, not more than he rall of he note is permitted to be east and majorities are just what the digarchy re-please. A make them I at after all a shoubtfur whether (leve-lar d's frau lulen pluralities in the "onfedor ACF" is ake really a larger aggregate it an Blame's actual pluralises in the "I inte I States 19 Certain is this, namely, that the sentiments of those states which have preserved by Lupin and perpetuated American nationality is is much of posed to the demoral courts now is at any time during the post twents to events

The civil service informers, whirehold if a veland and Hendri as are not pleased with the at terances of the latter. His speeches, particularly the one delivered at Brooklyn, me so shittonsly in favor of the species system as to produce in the minds of the independents a deep feeling of the minute of the intependents taken feeling of diagust, and their pournals are berating "the tail of the indeat" in good round state. At Brooklyn Heinfricks temanked: "If any we free to say that I am not particularly conflict it of the success of the school masker's lexamination but I have conflience in the service as it was in the days of A nilrey Jackson. Let a man come to be used into a local states. man come to be president of the Luded States And let true men be called around burn and a d him is the public service. Let these mon re-solve that the only qualification for the shall be bonesty and i these for the service and then 300 have civil service reform? "We should have nothing if the kin i," warmly rejoins it o New 1 ik 1/2 " It should have a sky preupt return) he spoils as an We no not going back to Andrew Fackson is in every that of political memo is "Of this we shall know more by and by the antinuing to free its mind in regard to Hendricks, he by settle him that he may a weight upon the party in the cortest, and it had to win in a use of the disinclimation of the reform vater to support him but he is a person of no consequence, will not be at the head of the new administration, and is not even one of the "time inen" whom the president will call around him

Now reals, it is unjust to trent Mr Henrepresentative of the democratic party fram Mr. Geveland is, and the chief regret of Tour-fifting of those who should be chief regret of Tour-fifting of those who should be chief regret of the fields was not placed at the head of the taker. This was natural, because of this long, and his long in Consolerious service as democrat, an because he is recognized and a cepted by the party as one of the noted men mut who represent its bister, its churu tr and set it see. M. Cleveluid his mitel it und is factors. M. Clevelund has made all ways been a denoury of the straitest so to but he has ad no cureer. He has been an obscure "copperhead," while Mr. Hendricks has been a conspicuous one. It is now to be seen whether the new administration will be controlled by the senuments and purposes which Mr. Hen dricks has recently been framing into speech, or by the promises of the 'independent' supporters of Mc (levelant | Tho profess of the latter against the interances of Heindricks, together with their reminders to him that the old getter with their remainders to him that the old democrate parts of which he is the representa-tive is dead, are signals of the contect that will be made for possession and control of the new administration. Will the "mugwumps" have it or the Bourbons. The franch of crul service policy or the spodsmen? In either case there will be usuff churth lively time to make some amusement for part if compensations of the re-Jubin us for the smart of their defeat

Mr. Cleveland is niged to must ite the preision of his administration on rivid service to form by taking theorge H. Pendigton into the cabinet Mr. Pendigton is term as senate with expire on the 4th of March, and the Ohio Jen orbits has thrown him overboard betwise of his advoca v of the civil service in v — If the vehill would put him into his cabinet he would only be carrying out his own professed views but it remains be seen whether he will have the courage in do it. To take into his cabinet the au for of the apollsmen of the party but Mr. Pendlet in 15 50 thorough-going a democrat that even he, no doubt, would let us "smany of the boys to warm

THE ORECONIAN IS NOW preparing its review of the year, which will be presented with usual fullness and accuracy. It will be an exhaustive embilit of the industry, business and progress of Furtisms and the northwest.

THE WAR OF THE ILTURE

The new method of was fare that is outlined Heneral Sheridan in his annual report will attract wide attention. He says improvements in destructive implements are going on at such a rate that soon neithers side in war will be able to stand up before the other. "Armes," he says, "will then resort to the spade, the pick and the shorel, both sides will cover themselves by intrenchaents, and any troops carner to make expresed attacks will be annihilated. The eld methods of reducing fortified places by means of rigidal approaches will be overfulne by the revelu ion caused by introduction of mod cin explosives. The larger force will have t energie the smaller one, and the length of time the besieged an hold (out will directly depend) pon their supplies of food and am number but this, said the general, pursing his forecast "waging war under a new code, on the enemy?" commerce upon land. Nations new attack ends His statement that with immoved mearing

such mutual destruction would be the result of thoops confronting each other in the open field, s scarcely sustained by the official reports of the killed and wounded in the late Franco-German war In that war the Pressams were a treed with the famous needle gun, and the French with the Chassepot, both being guns of the latest ruproved patter), and effective at long distances. Let, strange to say, the proportion of killed and wounded was less in trees battles than in the Peninsula war, when the old brown musket was he only arm or, if we need a later comparison, there were fewer men killed and wounded in the Franco-German war than in ou own civil war, in proportion to the numbers engaged. But he loos forward to a much greater con trust than that between the musket and needle gun. His heary rests than the confident ex-pectation that a "good magazine rifle" will be finally attained of far greater destructive powel than myth ng yet employed. The theory of the war of the luture thus developed is singularly interesting at d suggestive. The des rection (f. ould be protracted, and the intolerable loss of life would strangthen the demand for settling international quarrels by arbitration. Then if teneral Sheridan is right the peace is rey would be trumphant, the tion would be down with the lamb, and the "nations would learn was a

national law eformers to abolish the right of maritime caldure has a special into est. The proposal is at old one, and in a certain sense has the au hority of the United States on its side, though our self-interest during the war of rebellion ku our government to modify the p sition it took in the convention which concluded the treaty of Paris in 1856. The arguments against the abolition of maritime Laptura have been recently stated by Mr Lavelege in an interesting article in the Pill Mals Gaz the interesting article in the Pill Male Gaz ite. They rest, rate shows, not merely on the cousideration that persons engaged in peaceful pursuits should be spared the horrors of wan as far as possible, but upon the conception of this name of war uself, which General Sheralap ti inks must result from the improved weapons of war He says

A cutular has been sont by someone to the husiness men of Pritsburg, Pa, requising them, now that election is over, to cultivate a cheerful spirit and not talk so much of had times. The Gazet of that city admits an election ment of troth in the assertion that talk can injure incomess, but has very serious doubts whether talk can help business, particularly when depressed by the auful prospect of demoeratic domination. The suggestion is worth trying Lowever, for as Robert the rhymster said, "A cheerful spinit gols on quick. A grain bler if Ω c mud will stack."

Mr Blaine has often been bleeted by his ad unrers to Henry (13) In their attempts to grasp the presidency the resomblance is uncon-fortably/close. Claveland seems to be Blame's folk. Whether the parallel will be continued fo a years later remains to be seen

The prohibitionists are to be credited with at least one good action in the late elections. In Missouri they holted from the democratic party, and, as the result, tieneral Marinaduke's ma porty was only 500, when the late democratic governor was elected by nearly 40,000. This would seem to indicate that Missouri is getting beyond the dead line of the rebellion and tru i robling style of democracy

Old Beb Toombe of Georgia, though he has of ye c, lied the roll of his slaves from Bunker Hill mon iment, has lived to rejoice over the electron of a democratic president, which he is gards as the next best thing. land in the United States
In answer to the above it may be stated that Mr Blame carried eighteen states by the following pluratities, fractions of hundreds being comitted. Maine 20,100. New Hampshire 4200. omitted to be 23,000 Minsatchusetts, 27,900 Bhode Island, 5500 Pennsylvant, 81,100 Ohio, 31,600 Ill nois, 28,200 Michigan, 2800, Wisconsin, 14,600 Iowa, 18,700 Minnesota, Wiscousti, 14,000 Down, 15,100 minuteness, 41,500, Nebruska, 1, 400 Kunsas, 55,300 Colorado, 5200, Culforma, 15,400, Oregon, 230 Nevada, 1700 Total, 402,200. From which de-

duct Cleveland's pluralities Indiana, 7400 New Jersey, 4100, New York, 1100 Connecticut, 1300— total, 13,900 making Blaine's net plurality in the northern states, 288,930 In 1888 (stant's majority was only 905,458 yet Grant had the half of over 20,000 plurality in Tennessee, 17,900 in South (arolina, 12,000 in North Carolina and 4000 in West Virginia. It was immediately dier the war, and those states, had not yet reverted completely to their oil confederate masters. In 1864, when the election was decided upon the direct assue of saving the Union, Lincoln's inajority was 407 3L, or only 19,060 more than Blame gow has yet I, nealing time more than 19,000 from Maryland, and West Virginia states, which were held to the Un'on ly the northern a mee, and their rote secured to Lincoln through suppression of their rebel democracy Blame's plurality to the porthern states is much arger than that of

Hayes, though it is less than trackeld's I or this last fact there are two main reasons (Inc. is the combination in certain states between th) democrats and greenback o Butler people, the other loss to the republicans resulting from the withdrawal of the probabitionists on the une hand and of the liquor men on the office. Multi-gan, Iowa and New York illustrate these facts. In Michigan Blaine's plurality is only 290.1, while tarfields was \$3,000. But in 1889 the greentack vote of Michigan was \$1,605, and it was cast for a separate electoral tacket. This time it "fuse" with the democrats, and the two parties united on i single electoral ticket Moreover, the prolubin vote m Michigan m 1880 was but 442. The year it was 20,000, drawn mostly from he republicans In Iowa (an field had 65,000) [lurality But the greenbuck vote of the state, then 32,701, this year was allied with the democrats probabition in Iowa, enacted since 1880, has driven 40,000 Germans and others out of the republican party, and to crown all, the probibitionists of the state put a separate ticket in the field, which took many votes from Mr. Blaine. In New York the loss to the republicans through the conduct of the probabilitionists was more than sufficient to have given the state to Blane by a greater plurality than traffield received

It is apparent, therefore, that the ictual plus ality for Blame in the northern states is micro greater than that above stated, since Buttler's vote of 70,400 in Michigan and lowers reck ben-in this calculation for Cleveland. Place it 15 Butlet a credit, where it belongs, in I if e plurality for Blame will reach 450 000

We have not yet sufficient data upon which to found an approxing its statement of clevel in its pluralities in the south, nor does it in it er. In most of the states lot the late confeder or elec-tions are a faire, ut more than one ball of the tote is permitted to be cast and major has are just what the oligarchy are pleased to make them Let after all it is doubtful whether (leve land's fraudilient pluralities in the "confederacy" make teally a larger aggregate flow Blane's actual pluralities in the "I inted States". What is certain is this, namely, that the sentiments of those states which I we preserved the Union and perpetuated American nationality is as much opposed to the democratic party now is at any time during like past twenty-like years.

The civil service reformers who also told onand and Hendraks are not pleased with the nt terances of the latter. His speeches, purpoutaris the one delivered at Brooklin, are so phytously in favor of the spoils ejstem is to proling in the minds of the independents a feep fucing of disgust, and their journals are herating the tail of the ucket in good round style. At Brooklyn Hendricks remarked "I am very free to say that I am not particularly confident of the success of the school master's examination but I have confidence in the service as it was in the days of Andrew Jackson Let a man come to be president of the United States and let true men be called around him aid aid New York 1999, but should have there prompt return to the spons system. We are not going back to Andrew duckson as an exem Hu of publical methods. Of this we shall know more by and by Continuing to free its mind in regate to Hen tricks, the Lenes tells him that he was a weight upon the party in the contest, and it had to win in spite of the disinclination of the reform voter to support him but he is a person of no consequence will not be at the no consequence, will not be at the bead of the new administration, an i is not ever one of the "true men whom the president will

call around him.

Now, really, it is unjust to treat Mr Hendricks in this manner. He is more clearly a representative of the democratic party than Mi Cleveland is, and the chief rights of four-iffths of those who vate if or (leveland and Hen Iricks was that Hen iracks was not placed at the head of the ticket. This was outprol because of his long and consecuents sorrice as a democrat, and because he is renignized and accepted by the part) as one of the noted men on it who represent its history, its character and its proposes. M. Clevering his indicated ways been a democrat of the structest conspicuous one. It is now to be seen whether the new administration will be controlled by the new administration will be controlled by the sentiments and purposes which Mr. Hendricks has recently been frauing into speech, or by the promises of the "independent" supporters of Mr. Clevelind. The protests of the interest of Hendricks, together with their reminders to blue that the old democratic party of which he is, the representative indeed are expendent. tive is dead, are signals of the contest that will be made for possession and control of the new administration. Will the "mugywanps" have it or the Bourbons. The friends of civil service policy or the spoilemen? In eather case there will be a sufficiently lively time to make some amusement for partial compensation of the re-tubulant for the smart of their defeat

Mr. Clevelan i is urged to indicate the position of his administration on civil servila reform to taking George H. Pendigton into his cabinet Mr Pendleton's term as senat a will expire on the 4th of March, and the Ohio depostrats live thrown him overboard because of his astroday of the civil service law. If (leveland woul) pol-him into his cabinet he would only be carrying out his own professed views but it remains to be seen whether he will have the courage of do it. To take into his cabinet the author of the civil service law would give a shock to the spoilsmen of the party, but Mr. Pendleton is so thorough-going a democrat that even he, no doubt, would let in as many of the pays to warm their toes as he possibly could.

THE CRECORIAN IS now preparing its review of the year, which will be presented with usual foliaces and accuracy. It will be an exhaustive exhibit of the industry, equipmen and progress of Portland and the nurth west.

THE WIR OF THE LEFTAL.

The new method of warfare that is or thined leneral Speridan in his annual report will attract wide attention. He says in provements in destructive implements are going ob at such a rate that soon perther side in war wil. I can to stand my before the other. "Armes," he says, "will then resort to the space, and the shorel, both sides will cover themselves and the shorel, both sides will cover themselves by intrenchments, and any troops during to make exposed attacks will be sunth lated. The old methods of reducing fortified places by means of regular approaches will be overfarm I by the revolution caused by introduction of mol-ern explosives. The larger force will have to encircle the smaller one, and the length of time the besieged can hold out will directly depend upon their supplies of food and ammuniton?
Bu this, said the general, pursuing his forecast,
will make wars so long that they cunnot be endured in that form, and nence we shall find men "waging war hader a new coile, on the enemy's

His statement that with improved stearins such mutual featraction, would be he result of troops confronting each other in the open field, is scarcely suntained by the official reports of the killed and wounded in the late Franco-termal war In that war the Pruesians were armed with the famous needle gun, and the French with the Chassepot, both being gans of the latest improved pattern, and effective at long distances let, strange o say, the proportion of killed and wounded was less in these battles than in the Peninsula war, when the old brown masket was the only arm of, if we need a later comparison, there were fewer med killed and wounded in the Franco-German war than in our own civil war, in proportion to the numbers engaged. But he looks forward to a much greater contrast than that between the musket and needle gun. His theory rests upon the confident expectation that a "good magazine rife" will be hually atlauned of far greater destructive power than anything ret employed. The treory of the war of the future thus developed is singularly interesting and suggestive. The destruction of commerce on the high seas would be followed life would sirengthen the demand for settling international quartels by arbitration. Then if teneral ther den is right the peace outy would be trainplant, he how would be down with the labib, and the "nations would learn war no

In this condition the proposal of the inter maritime capture has a special interest. The proposal is an old one, and in a certain sense has the authority of the United States on its said, though our self-interest during the war of intelligent led our government to movify the position it took in the convention which conluded the treaty of Paris in 1856. The arguments agains the abolition of marit me capture have been recently stated by Mr Lavelege in an n teresting article in the Pall Mell Gazette. Ties rest, as he shows, not merely on the cou-sideration that persons engaged in peaceful p around should be spared the horrors of war as far as possible, but upon the conception of the flimks must result from the improved weapons

war He sign "There are two different sorts of warefare, or ann According to the second the state of war fare only axists between the armos, who are expected to respect the life and property of all peaceful inha stants of the enemy's land. It was not climited by the king of Pressia in 18 0 when he assess the proclaim? men the the we making war again not against I reach citizens, and that the latter would "cortaine to injoy perfect security, both is regards their persons and their cossessions, so long as the, to not deprive me of the right of protecting them by engaging in and enterprise bestile to the cerman troops." There is no inherent distinction between bombarding a wealthy town because it will not surrender and cap-turing a ship at sea, or between levying a requi-sition on a number of defenseless inhabitants and staking or burning a merchant tessel. The mjury thus infli ted upon an enemy makes war more to be dreaded by commercial nations. The more the wealth and commerce of such nations him in the public service. Let these near resolve that the only quaintection for office shall

> The salmas of postmasters, by the law of 18 d, were to 1 a regulated by the amount of terems to an their others. Ten years later a new system was adopted postmast a were devided into five classes, with a bremmal readjust ment of cer pensation. This was found in practice to work injustice towards the postinus ters of the third, fourth, and fifth class, and therefore in 1866 (ongress aments) the law of 1804, by providing that if, under that law, post masters did not get as much salar, by 10 pe. cent as under the act of 1854, the should be readjusted quarterly and this 10 per cent jut on. The law was peremptory, but the postmaster-general did not so understand it and ichused to make the required readjustment. A test case was bedded by the court of claims in favor of the claimant Since then the law seems to have been properly enforced, but a large number of clums covering the period of tensions from 1804 to 1874 icome and much abed It was to cover these cases that the act 1855 was passed. That act required the postmuster-general to perform the task that his predecessors and neglected or refuse I to co. It was a hard task, though an act of simple jus-tine. The claimants numbered the isancs and the impoint involved was estimated at half a tion hard at work on the readjustment of these claume, and has get down the hat of states to the

A Weshing on politician who is warmly interested in the sincess of the new administration, says. "The lamocratic party is somewhat in the condition of men who, like the treety sur vivors, were rescued on the verge of death, perishing from starr then, exposure and wint. These men were laken from their rude shelter amidst ree, snow and rocks, to comfutable therths on the rehef ships, and surror nded by an abundance of ood and warmth. Medica str-ence teaches us that if these mgn hall been given all the food they could have consume i. it twould have been certain death to every par-taker. They were fed in homeannaths doses, and now all of them are well and strong. If they claud should at once give the democratic partisans all the patronage for which they hunger it would be the death of the party. Their stomachs could not endure such a strain, and they would people.

idmiral Po ter flunks the Esmeralda, a shipman-of-u or boult in England for the nazy of Chile, is the most perfect vessel of her class ever put upon the water, and evidently he would be glad to have a fleet of such ships constructed for the Uniter. States navy. The Esmeralda can be driven at about seventeen knots an bour. Admiral Porter shows that it is folly to expend money for more steel gruiners which will be too from to serve as "commerce destroyers," and

his opinion ought to have weight. Undoubted-It a four war vessels of the first-rises are needed to grand our chief seaboard cause, but it a non-conceded by naval expense of Europe that no armer an resist the heaviest guns of modern times, and it would be a waste of money for the In ad Sates to attempt to built a freet to rival the displete fleets of Fugland, France or ter-mant. In the Old World the value of swift's eel crimers and of a thorough torpedo equipment is stead by Amming recognition, and there is no con thy where thest appreciation of it is more important than in this republic

The Bonn-vill of Accident — (otoner cooks, at the request of the radroad _ompany went to Bonneville; esterday to hold an inquest over the remains of A McDonald, who was killed here the day before. He was accompanied by D A McDonald, brother of the deceased. The accident happened about half-past 5 in the evening. A force of men, including bit Donald, had been engaged in binding a ridge at 0 e the station, and had returned on the construction fram, which was switched for a side track. The engine then backed down the main track to take water, passing the cars on the switch, with only four feet between the tracks. It was running about fifteen ailles an hour, the belt inguing. McDonald either walked from the sudictack across to be main line, or juriped across, probably the latter, because, according to the testimony of two winesses, he was only four or five feet from the engine when he reached the main track. It was quarte dark at the time, and the engine coming u on him backwards, he could not see the heading it. The body was brought down last night and is now at Cotoner Cooke's rooms.

PAW BROKERS USD STOLEN FORDS I tiler Dougheity sesterday recku ned the Lobi watch stolen from his drawer and pawned by his trusty, frank Reunolds. Their privar holder desired to have the money he had mistaled of it the watch retunded and Dougherty referre from to the county court. Indge Steams could not see just where the money was to come from, as the county has provided, no fund for suci par poses. It is uncertain how the matter will be settled. A man has a right to claim stolen property wherever he finds it, and if a pawintroker takes stolen! goods in pedge he is liable to suffer. When the pelice find stolen goods at a priving-broker's they endeave to hive the owner refund the sum anvanced, which is general? Home cherfully, as the parties are glot to get their property back on these terms. It withorkers often are able to render valuable assistance to the police in continuous the miscase the watch stolen indicate belong to Bougherty, and he does not feel like gaying the sum advanced on it and it all the lebong to Bougherty, and he does not feel like gaying the sum advanced on it and it pricable that the "Direle" will be out and injured. There should be more care exercised in receiving piedges, and persons vishing to pawn goods should be made to give in account of themselves and the broker wild thus often ascape the danger of being con idered a "fence". Rejnolds, it is quite certain has gone to Van o iver and his arrest is expected before long.

AN EXCUST FOR EI EVENTH STREET -A member of the committee on streets and public property, defending his self against the trugge of negligence in the Eleventh street improvement, whereby the city was drawnin a a liw suit and the treasury depleted, said yester lay to an Origonna Areporter. "The principal ground method and the treasury depleted, said yester lay to an Origonna Performance of the Committee of the Commi soil and the treasury depleted, and yester lay to an UNERGONIAN reporter "The principal strumd on which the owners of property behevited research the payment of their assessment is a sechnicality. The ordinance called for macalamining the roadway that with, whereas two fest in the center of the roadway, occupied by the street railroad, was planked." Assuming for the sake of argument that the work was done satisfactorly, which it was not whose fault in that no provision was made for the streetiraliway work. But the numbers of the committee and the cuty officers directly engaged in joining and supervising street work forget in two and seem to the average tax paget that council near engaged and seem to the average tax paget that council near engaged are identicated to the direct suppose of in hem as committeened, or "sell out to some one who will attend to them?" Council near rice elects to protect trapayers against contractors, not it shield contractors. By the way, no excuse was o few for for furth street, and deflexen street.

PROBABLE STICIDE BY CHINESE.—Last evening Policemeh Belcher and Holimberg found two Chinamen on the what at the foot of B street, and on man ring what they were doing, they said they were waiting for a china ship which was coming in a short time. They wrote a note and waited Holimberg to take it ways up town, but he could not go off his beat. Belcher soon found out by manning of he plots that no china ship was coming in, and went hack to look for the two Chinamen. They were not to be found, but a lot of burning lanks was found and on a piece of board near by was pinned the intellection of the said and on a piece of board near by was pinned the intellection of the said and in an interpreter found, who said that the writer said he and his friend were poor and contid get nothing to eat, and they were going to go in the water. The note was think laken to the person to whom if was addressed and lead by him. He said that the parties who send it said that the law been poisoned by a Chinese doctor and were going to go in, on, upon or into the water—there seeming to be an uncertainty about the preposition which is no cledit to the Chinese that there is heap too much fooled in the letter, but in the meanline the mean are prissing—and they can be spated.

WESTKEN OREGON.

WESTREN OREGON.

The people of out-of-the-wr, places in western (regon, continue to make effigies of Cent John and burn them.

John W. Allen of Polk county attemp ed to shoot a cat, but instead of hitting the animal, ladged the ball in his leg above the knee — Up in Linn county about Scio, says a correspondent, postofices will be established every five infles, in order a create offices for the clamorous "univashed"

It is reported from Corvality that the entire grade of the O P read will be completed today. The track layers will be at work on Mon day to lay the last sixteen infles.

A correspondent at Newport, Benton county, says within a radius of three miles of this place the buck inherry bushes are groaning under their neary load of luccous fruit. A party of three, one day last week picked fourteen gailous in the short period of two hours.

Captain S M Swigert and Lieutedant Fred W '1bley, Second cavility, ordered to Jefferson Furracks, Mo, on special duty leparted from F rt Walla Walla on Sunday list.

Major Riy Med Jelling, surgeon, 1 S A, for men; stationed here and remembered with pleasure by many friends, has arrived with his family at Jefferson harracks, Mo, where he was assigned to duty on leaving Fort Trumbull Mr A. Downing, typographical assistant, returned last week from the Okinakane country, where the Moses Indians live Moses and Tenastet, with their bands, are located within 100 miles of Fort Spokane, and have commenced furning Susaphina band will join teem next as said prolably. The site for the new flouring mit tobe put up by it e government was selected on Prairie creek in the Okinakane valley. Mr Itowning says every Indian on the Colvilo reservation now knows that 100 cents inake one dollar, and none of them can be fooled on the price of oils. University Bender 100 cents inake one dollar, and none of them can be fooled on the price of oils.

The old singe road across the Blue mountains went out near v as from Pendleton and crossed a fig hill cible i the "hog's back," not fur from where becage Goggan was slain by the Indians in 1878. The course of the O.R. & N. branch is nearly northeast out of Pendleton, following the course of the Umailla river about twelve inlies to a station called Cayuse, near the mouth of Meacham creek, where it leaves the liver and assends the creek by a grade averaging 108 feet to the fills for four index and I be feet for the remaining distance to the Summit. Of all the mean streams a bandle with railroad embrukments there can be nothing more tracklerous re can be nothing more treatherous cance But when it gots up to a full "boom" it is not only a 'rver in size but as cangerous a fur ras can be found. Its hends are so abrupt that no embackment of loose rock could be formed to turn its angry current, hence the fills were underlined with what is known as "log caburcibs," constituing of tiers of hewe timber with clussel points, rach ther extending a foot becould the trer above it. Some of these cribs held twelve or fourteen iters of limber and the rold has the appearance of being butt on honor. The defensive equipment of the road all through this wild and precipitous country cannot fall to strile the beholder as the most prominent characteristic of the work and if the thirts four nules after leaving "discens ded not cast \$1500 a nule for defenses alone, I built miss in calculation.
